

Electrical Services Division

Executive Summary

Hypower Inc.

Hypower Inc. is a diversified South Florida based provider of Energy Management and Communications Solutions. Established in 1991, we are a service oriented company that has successfully delivered hundreds of projects nationally. Hypower has become one of the largest electrical contractors in the state of Florida with 7 divisions & 6 offices throughout the U.S.

From planning to installation; with safety, quality & productivity, Hypower has continually proven to be:

"One Company, Powerful Solutions"

- **Airfield Services Division**

builds airfield lighting & FAA navigational-aid systems on airports globally.

- **Disaster Services Division**

mobilizes to maintaining generators, fuel emergency vehicles & remove debris.

- **Electrical Services Division**

is one of South Florida's largest commercial electrical contracting operations.

- **Federal Services Division**

holds GSA Schedules 03 FAC Maintenance & 56 Renewable Energy. All divisions support federal projects.

- **Power Services Division**

builds transmission & distribution infrastructure including substations for utility companies throughout Florida.

- **Renewable Energy Division**

designs, builds & integrates solar & wind power systems for commercial & utility clients.

- **Telecom Services Division**

works with large communications companies & municipalities to build their outside plant telecommunications infrastructure.

Electrical Service Leaders

Scott Williams

Commercial
Division Vice President

Mr. Williams has 20 years of industry experience with a wide range of construction types. His project experience includes commercial industrial, pharmaceutical, hospitals, & solar installations. Scott oversees Renewable Energy & Commercial Electrical Services projects from inception to completion; ensuring project quality & customer satisfaction.

Nick Giannoutsous
Service Manager

Mr. Giannoutsous is responsible for scheduling, estimating and managing all projects in the Electrical Services Division. His knowledge of the industry and of products ensure clients will have the best end result. Mr. Giannoutsous (Nick) is committed to quality service and customer satisfaction. He can be reached by his client's 24 hours a day.

Hypower is recognized as one of the state's foremost electrical service providers combining safety & quality with efficiency & cost effectiveness.

Our teams have extensive experience with projects of various size & complexity.

Hypower Electrical Services

- Neighbor's Grocery** - Generator Installation
- FDOT (Florida Department of Transportation)** - Electrical Improvements

24 Hour Emergency Response Services

- *Annual Service Contracts*
- *Generator Installation/ Maintenance and Fueling*
- *Infrared Scanning*
- *Voice/Data Solutions*
- *Preventative Maintenance*
- *Security Lighting*
- *Service Repair*
- *Tenant Improvements*
- *General Maintenance*
- *Landscape Lighting*
- *Inspection Repairs*
- *Code Violation Corrections*
- *Surge Protection*
- *Upgrades*
- *Satisfaction Guarantee*

Easy To Be Green Solutions

- *Energy Retrofitting*
 - *AC Reduction*
 - *Daylight Harvesting*
 - *Controllable Window Shades*
 - *Occupancy/Vacancy Sensors*
 - *Lighting Controls*
- *High Efficiency Lighting*

Hypower's Service Division & Hypower's Renewable Energy Division Work Together To Design & Install the Best Energy Saving, Cost Effective Energy Retrofit Plans

References

"Our firm, DFW Consulting Group, worked closely with Hypower on the Miami Lakes Sky Latin America broadcast facility. The facility's electrical system was made up of 4,160 volt distribution, closed transition transfer switchgear, two 2MW diesel generators, 2250kVA uninterruptible power system and an intense quantity of dedicated circuits to all the broadcast racks. The cost of the project was approximately \$120M. Hypower completed this project in 6 months with superb crews working 2 shifts and never allowing quality to suffer. Their firm is well organized and dedicated to both their people and the project. Not only did I enjoy working with them but came to respect their diligence, attention to detail, and the stringent compliance with the contract documents. I would not hesitate to recommend Hypower for any project that they deem themselves capable of handling."

Julian Rachman
Professional Engineer
DFW

"On behalf of Republic Services, Inc, I would like to express our gratitude with the performance and professionalism demonstrated by Hypower during the installation of our e37kW Photovoltaic system. We are extremely impressed with the design, installation, and performance. Everyone at Hypower was excellent to work with and responsive anytime I called.

Due to the unfamiliar technology, this project had the potential to cause great confusion and frustration. The experience Hypower has as an electrical contractor, and as solar integrators, was instrumental to the project being so successful.

We recommend Hypower and can attest to their abilities."

Kimberly P. Riehn
Project Manager
Republic Services, Inc.

SKANSKA

"To all at Hypower, your dedication and efforts were once again unmatched as you exceeded all expectations on the Heron Heights Elementary School project. Your expertise in electrical and solar power was instrumental in completing our project ahead of schedule. Integrating two separate types of solar technologies for a combined 50 kW system is almost unheard of yet you performed the task flawlessly. Additionally, this commitment to excellence was demonstrated by providing the school district educational seminars, detailed follow-on training, and an interactive solar monitoring website. This is why Hypower is one of our Top Performing Partners!"

Dana Nelson
Project Manager
Skanska
