Summary

HYPOWER ELECTRICAL SERVICES GROUP

WHAT OUR CLIENTS SAY:

★★★★★

Service Jobs:

"I have been in the building engineering field for over 15 years and have worked very closely with many different trades, both in new construction and older buildings. When I started at Margaritaville Hollywood Beach Resort I was skeptical of all the companies the building was using as their outside contractors(because of past experience).
Hypower was one of the first outside contractors I had contact with. The experience made me feel better about their capabilities, eagerness to resolve issues, and quality of workmanship. Gus, one of their licensed service techs is very knowledgeable, hardworking and always has a solution for any problem we have had.
I would and do recommend them to anyone that asks for a reputable electrical contractor."

TONY RODRIGUEZ,
Assistant Director of Engineering-
Margaritaville Hollywood Beach

★★★★★

Multiple Projects:

"As a general contractor, we have been using Hypower Electric since our inception. Their workers are professional and up to the task at hand. I feel like my business is valued and that I am treated the same whether we are working with them on a larger commercial project or a small job in a home. Most importantly, they stand behind their work. In the rare instance when there is an issue after the work has been completed, they willingly return to the site to address the situation. Hypower continues to improve on their already strong reputation.

DAVE AND RHONDA ROSENOF,
Big Dog Construction Services
