Turnkey Generator Installation Services

Hypower provides Turnkey Generator Installation, Service, and Maintenance. Let Hypower handle all aspects of your Generator project including Design, Optimization, Engineer, Install, Permitting, Service, Maintenance and Repair. Hypower is a general contractor specializing in commercial and industrial electric, electrical service, and utility contracting. The company works with some of the leading general contractors, utilities, developers, and institutions in the United States. Hypower operates through several divisions specializing in heavy civil electrical infrastructure, electrical building construction, outside plant power and communications projects, airfield lighting, and ground-mount and floating solar farms nationwide. The company also specializes in 24/7 commercial and industrial electrical service and repair in Florida. Founded in 1991 and headquartered in Fort Lauderdale, Florida, Hypower employs more than 400 people and has successfully completed over 1,000 projects valued at over \$1.2 billion. Licensed to operate in more than 30 states, Hypower consistently ranks at the top of national leaderboards for its exemplary safety and innovation record within the construction market. Hypower Electrical Services and Special Projects Group provides 24/7 high-quality and professional services to local businesses, property managers, assisted living, institutional, and industrial facilities. The group services most of South Florida, handling projects from simple service calls to new construction. Hypower has served Florida for over 30 years and is fully licensed, bonded, and insured. The Group is currently helping to rebuild the west coast of Florida while installing hundreds of EV chargers and generators and completing 40-year instruction work across the state.

Hypower Office Locations

STEP 1: Assessment

01

We will send one of our trained and licensed technicians to assess the entire setup of your facility. We will discuss your goals and in many cases, we will find out if you need emergency power backup for the entire building or just certain sections.

STEP 2: Design and Engineering

02

- Once we determine the right approach, we can provide engineering or work with your engineer of choice
- We will work to obtain all needed permits – not only electrical but also structural, plumbing, fire-alarm, landscaping, etc.

STEP 3: Removal of Old Generator and Upgrades

03

- We will remove the old generator and if needed we will provide temporary backup power and fuel until your new generator is up and running. (we can provide generators up to 2000 kW)
- We will work on the concrete pads, landscaping, and layout (if local laws require).

STEP 4: Installation and Testing

04

- We will install your new generator (or your old generator)
- We will turn the power back on and commission the generator.
- We will perform all tests to make sure everything works seamlessly.

STEP 5: Training and Maintenance

05

Our licensed and certified service technicians will provide training for the Facility manager and maintenance staff.

Market Differentiators:

- 24/7 Emergency Electrical Service
- Impeccable Qualifications
- Professional, Bonded, Insured
- Licensed Journeyman Electricians
- Screened, Uniformed and Badged
